

transcript_variant_matrix

make_lookups

transcript_variant_matrix_to_gene_variant_matrix

```
graph TD; A[transcript_variant_matrix] --> C[transcript_variant_matrix_to_gene_variant_matrix]; B[make_lookups] --> C;
```

The diagram illustrates a process flow where two inputs, 'transcript_variant_matrix' and 'make_lookups', are combined to produce a single output, 'transcript_variant_matrix_to_gene_variant_matrix'. Arrows from the bottom of each input box point towards the top of the output box.
